

Samsara Delay

OVERVIEW

For more than 15 years, Budda Amplification has led the low wattage boutique amplifier revolution. Now Budda proudly introduces the Samsara Delay pedal. The Samsara Delay provides 600 ms of delay time. Vintage sound and easy controls help you dial in just that right amount of delay, whether you are looking for a bit of slapback or full on U2 inspired ambiance. With the tone control you can mimic the low-fi sound of an old analog delay or crisp up the highs for a more modern tone.
