

Zenman Overdrive

OVERVIEW

For more than 15 years, Budda Amplification has led the low wattage boutique amplifier revolution. Now Budda proudly introduces the Zenman Overdrive/Boost pedal. With a wide range of distortion tones from smooth overdrive to all out crunch and grind, the Zenman can fit into a wide range of music types. The Zenman also has a very useful Phat/Vintage switch that changes the EQ to further enhance the tonal shaping that can be achieved. The coup de gras is the Boost feature with it's own level control. The boost can be used with or without the overdrive, so the Zenman can pull double duty as an overdrive, an overdrive with a solo boost, or just as a clean boost pedal! You'll be proud to have the Zenman on your pedalboard.
