

Budwah Pedal

OVERVIEW

The hidden artillery of professional touring musicians, the Budwah™ Budda Wah has long been regarded as the finest Wah-Wah pedal available. Now Budda has updated and improved the Budwah with major enhancements, taking the same tried and true sound to an even higher level of quality and durability at the same great price. The Budwah's popularity comes from its use of a custom inductor voice that produces the midrange honk of vintage wahs without the top-end harshness. At bass settings, the Budwah's™ tone is thick without losing note clarity. When accentuating the highs, a carefully selected roll-off frequency ensures the Budwah™ isn't piercing, which is the case with so many other wahs. The Budwah's™ tight and focused tone sweep produces an outstanding vocal-like quality. Circuitry features a hard-wire bypass; custom coil inductor inspired by the vintage Fasel inductor; full-ground plane board for noiseless operation; and a beefy, reliable switch.

FEATURES

- Heavy-duty switch with improved duty cycle
- Superior wiring with heavy-duty RF shielding, and hand soldered connections, double-reinforced with commercial-grade adhesive
- Heavier case for enhanced stability in live performance
- New battery compartment with door and battery cradle
- Military-grade, sealed potentiometer
- Weight Unpacked: 4.41 lb(2 kg)
- Weight Packed: 4.41 lb(2 kg)
- Width Packed: 4.825"(12.2555 cm)
- Height Packed: 11.25"(28.575 cm)
- Depth Packed: 3.625"(9.2075 cm)
